Experience

Alta Planning + Design

November 2018 - Present

Web + Digital Team Leader

<https://altago.com>

Led the development of all web-based projects for both client projects and internal tooling and support. Coordinated and collaborated with both non-technical creative team members and industry discipline expert staff to develop highly custom and technically mature web products to support and advanced a range of urban planning and design projects. Collaborated with civic analytics team to plan and develop in-house data science

infrastructure and visualization tools. Established, implemented, and documented web & digital best practices and fostered the growth of the team and its strategic role.

Totally

August 2014 - August 2018

Founding Partner & Technical Director

<https://totally.agency>

Conceptualized, planned, and executed digital identity and web projects for brands, businesses, and non-profits of all stripes, emphasizing content- and user- centric approaches to design and development, crafting branded platforms to further clients' business, marketing, and culture goals. Collaborated with clients from concept through final delivery. Managed local and remote development teams, outlined project requirements and delivery standards, performed code and QA reviews, and collaborated with junior developers to address project needs and client feedback.

Total Design Shop

September 2011 - Present

Web Developer & Designer

<https://www.totaldesignshop.com>

Designed, developed, and maintained award-winning custom websites and applications for a variety of commercial and non-profit clients, leveraging modern front-end frameworks, CMS platforms, build processes, and cloud infrastructure. Produced static mockups, prototyped, and iterated original visual design concepts, incorporating project specs and client feedback, to produce tailored, branded web experiences.

Freelance

January 2009 - December 2015

Creative Web Engineer

Developed comprehensive web experiences with an emphasis on user experience, mobile-first and responsive design, third party integrations, content + brand strategy, and email + social engagement. Engineered and integrated tailored web and content platforms with back- and front-end frameworks and modern content management systems.
